

AIRLINE KENNEL REQUIREMENTS*

For their comfort and safety, all domestic cats and dogs traveling by aircraft are required to be transported in a kennel that **conforms** to the IATA Live Animal Regulations, as shown below:

IS YOUR KENNEL THE RIGHT SIZE?

It must be the correct size to allow the animal to **STAND**, **SIT**, **TURN AROUND** and **LIE DOWN** in a natural position.

* This kennel requirement is acceptable for most breeds of domestic cats and dogs. Some rigid plastic containers may not be suitable for large dogs or dogs that are strong or aggressive. See an agent for more details.
