Certifications for third-party facilities should be validated independently directly with the third-party.*

CERTIFICATIONS

CEIV Air Canada Cargo is certified by IATA's Center of Excellence for Independent Validators in Pharmaceutical Logistics (CEIV Pharma). Locations in our network that have received CEIV Pharma certification are indicated above.

GDP Goods Distribution Practice certification requires pharmaceutical product handlers to meet stringent World Health Organization (WHO) standards for safety and security.

AC Pharmacair

For pharmaceutical and healthcare commodities that do not require an active temperature controlled unit, AC Pharmacair offers two tiers:

AC Pharmacair Simple

ERT: 2°C to 25 °C.

AC Pharmacair Simple is suitable for products that have a tolerance to ambient conditions during the transportation schedule.

AC Pharmacair Plus

COL: 2°C to 8 °C | CRT: 15°C to 25 °C.

AC Pharmacair Plus is for products that are more sensitive to ambient temperatures and require storage in temperature-controlled holding areas.
